Re: ***Amendment of Parts 2 and 90 of the Commission's Rules To Create a New Frequency Allocation for Wireless Broadband Services (RM-11715)***

Dear Ms. Dortch:

The Dynamic Spectrum Alliance (DSA) supports the issuance of a Notice of Proposed Rulemaking by the Commission in order to develop a more complete record concerning the feasibility of sharing the 10.0-10.5 GHz band among federal, amateur, and fixed and mobile users, the potential new commercial uses of the band, and the rules to enable both. The capability to share underutilized spectrum is one way to meet the skyrocketing demand for both fixed and mobile wireless broadband.

The DSA is a global, cross-industry alliance focused on increasing dynamic access to unused radio frequencies. The membership spans multinational companies, small-and-medium-sized enterprises, academic, research, and other organizations from around the world, all working to create innovative solutions that will increase the utilization of available spectrum to the benefit of consumers and businesses alike. A list of members is available at www.dynamicspectrumalliance.org.

Sincerely,

A handwritten signature in black ink, appearing to read 'H. Sama Nwana', is written over a light grey circular stamp.

H. Sama Nwana
