

Jamaica's Digital Landscape

At a glance...and the changing RF
Regulatory space

DSA- Global Summit 2023

Global Mobile Traffic Forecast Region 2 (5x in 5 years)

NOW

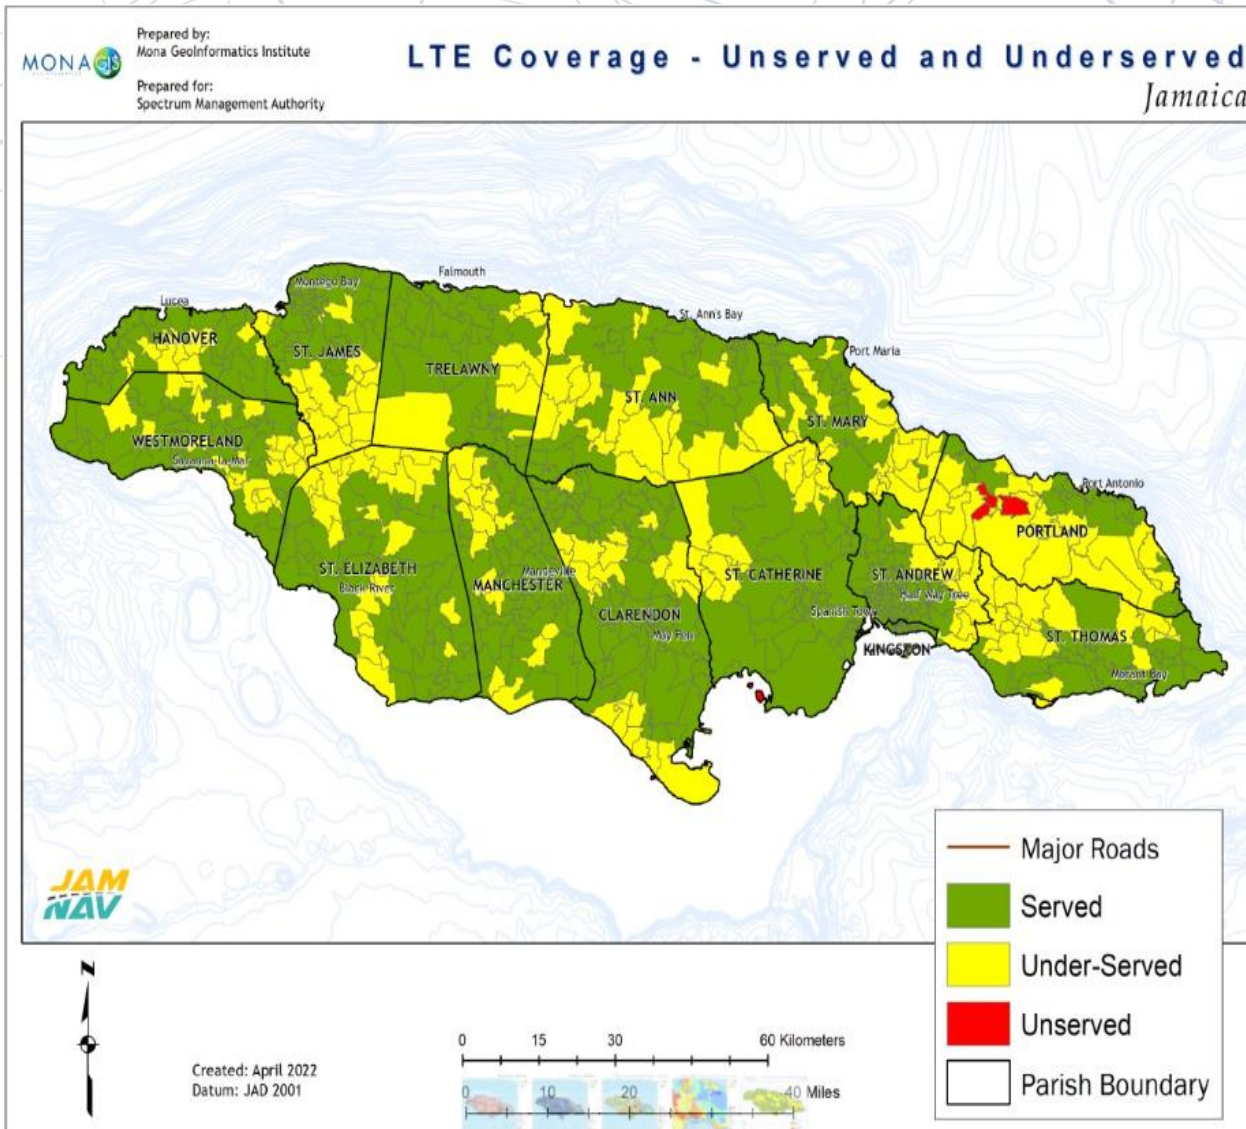

Average data consumption
per user per month
(Jamaica) is about **5 GB**

FUTURE

Based on the global forecast for
the next 5 years, we are looking at
about **25 GB**/per user/month

Map Highlighting Underserved and Unserved - 2022

	Population	Households
Unserved	2901	914
Underserved	398,785	112,462

Jamaica 'S Journey..... Bridging The Digital Divide

GOJ Policy Objectives

**Increased
competition in the
Jamaican mobile
market**

**Bring coverage
to underserved
areas**

**Generate
Revenue for
the Treasury**

Primary Drivers of Broadband Uptake

AFFORDABILITY

AVAILABILITY

ACCESSIBILITY

Four Pillars of Action

UNIVERSAL BROADBAND ACCESS

**Maximize
existing assets**

**Deliver shovel-
ready projects**

**Incentivize
investment in
broadband and
cellular
infrastructure**

**Modernize
government to
remove barriers**

MANAGEMENT
AUTHORITY

Spectrum Management Authority | 13-19 Harbour Street, Kingston Jamaica | www.SMA.gov.jm

Global mobile industry contribution to GDP worldwide from 2014 to 2025 (in trillion U.S. \$)

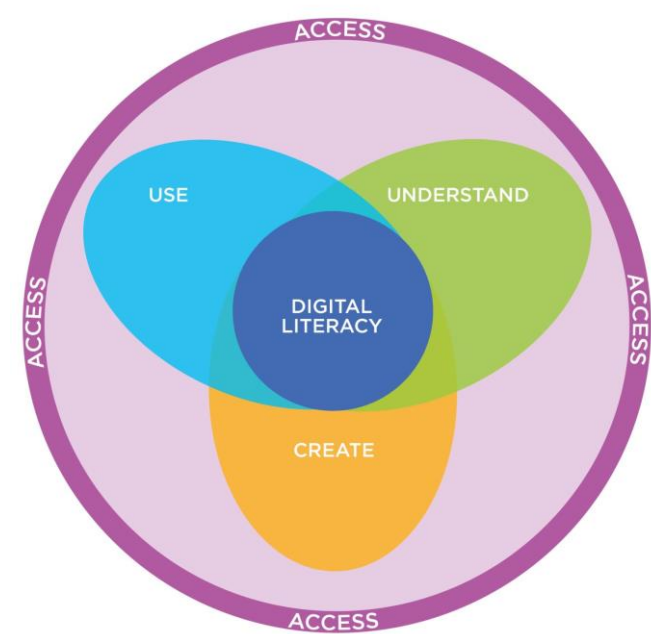

In 2021, the mobile industry contributed 4.5 trillion U.S. dollars to global GDP, which makes up 5 percent of global GDP overall. The source projects that this will increase to 4.9 trillion U.S. dollars by 2025 (Statista - 2023, Taylor)

Growth of Economic Sectors in the GDP from 2011 to 2021

The Caribbean Region: Challenges

- Not enough data to benchmark
- Countries of reference: Americas/ Europe?
- Caribbean islands have a different national reality
- Telecoms markets with few competitors
- Service providers are licensed separately in each jurisdiction and, therefore, each is a separate market.
- Limited technical human resources – the brain-drain effect

In order to Future Proof the Space... Spectrum Regulators will have to ensure:

Optimize the utilization of radio spectrum

Identifying the spectrum need for new wireless networks

Establishing new regulations, technical parameters and standards

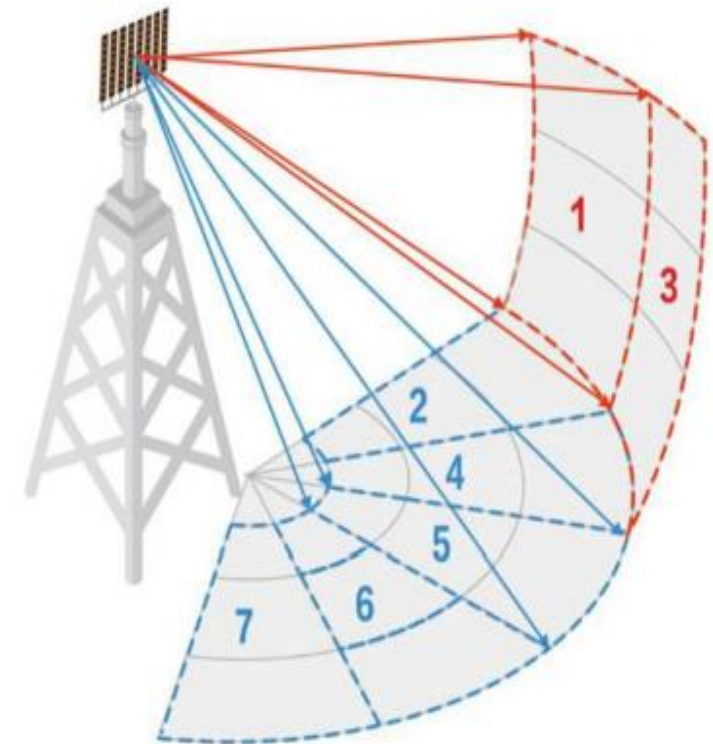

Undertaking special coordination work

Maintaining and updating all new information

Utilization and protection of orbit/frequency resources

Example of a 5G cell with 7 SSBs

Addressing the Issues – Agenda Items that will ensure

- Economic development – GDP growth
- Mitigate social challenges
- Change in user behavior towards positive outcomes.
- Security aspects – Data and Access
- Impact on current regulations – must be relevant

Responsibility

Development

Security

Quality
more important to
consumers than price

Quality of Service
(QoS)

Increase Capacity....

- Replace older technology with more spectrally efficient technology
- Install more infrastructure (e.g. cell sites)
- Use more spectrum
- Offload data to other networks (e.g. WiFi)
